

City of Seattle

Paul Schell, Mayor

Seattle Public Utilities

Diana Gale, Director

January 27, 1999

Dear Proposer:

On January 26th, the City signed a Letter of Intent with Northwest Waste Industries (NWWI) which commits the City and NWWI to negotiate a contract for commercial garbage collection and residential yard waste processing. Therefore the City is deleting the yard waste processing option from the Residential Solid Waste Services RFP and extending the RFP due date to Friday, February 12, 1999, 2:00 p.m..

Enclosed is Amendment 2 to the RFP which deletes yard waste processing as an option. Please note however, that separate food waste processing is still an option. The base proposal also still allows proposers to commingle yard waste and food waste for collection. An alternate proposal could also include yard waste transfer.

The amendment packet consists of the individual pages from the RFP that have been changed. Please note that Form 6, page VII-17 is deleted and Form 10 and Form 11, the required price forms have been amended.

I realize that this change comes at a very late time in the RFP process and I apologize for any inconvenience. Hopefully the two week delay in the submittal deadline will enable proposers adequate time to modify their proposals.

Sincerely,

Edward Steyh
Project Manager
